## 2017 SIPS

Organization: Flogen

Start: Oct 22 2017

End: Oct 26 2017

Location: Cancun, Mexico

Welcome to the 2017 Sustainable Industrial Processing Summit and Exhibition. Following the previous rich tradition, the summit will cover 3 sustainability pillars: (1) Science, Technology and Industrial Practice, (2) Political and Social Framework and (3) Education.

This time, the summit honors the 2017 STARS of the closed cycle of materials sciences: from mining and mineral processing to metals extraction and processing and development of new materials. They are in alphabetic order:

- Dr. Patricio Barrios - 2017 honoree with Barrios International Symposium on Sustainable Non-ferrous Smelting and Hydro/Electrochemical Processing
- Prof. Harold Dodds - 2017 honoree with Dodds International Symposium on Sustainable Energy Production
- Prof. Marcelle Gaune-Escard - 2017 honoree with Gaune-Escard International Symposium on Sustainable Molten Salt and Ionic Liquid Processing
- Prof. David Goodall - 2017 honoree with Goodall International Symposium on Sustainability of World Ecosystems in Anthropocene Era
- Dr. Norman Lotter - 2017 honoree with Lotter International Symposium on Sustainable Mineral Processing
- Prof. Fernand Marquis - 2017 honoree with Marquis International Symposium on New and Advanced Materials and Technologies for Energy, Environment and Sustainable Development

The honorees cover areas of materials sciences that look distinct but are actually related to each other and all have in common sustainability.

In this view, in their honor, the summit incorporates numerous International Symposia covering the field of minerals, metals and materials - dealing with mining, extraction, processing, manufacturing, recycling, waste treatment, and acting on environmental, health, legal, management, financial, policy, taxation, social and pedagogy issues. Please click on the "symposia" link in the left side menu for the full symposia listing
