

2017 - Sustainable Industrial Processing Summit & Exhibition

2017 SIPS

22 - 26 October 2017
Fiesta Americana Condesa, Cancun, Mexico

BARRIOS INTERNATIONAL SYMPOSIUM
on Sustainable Non-ferrous Smelting & Hydro/Electrochemical Processing

ROUND TABLE AGENDA
Wednesday & Thursday,
25-26 October 2017

Time	Subject	Content
Wednesday 14:30-15:30	Concentrate Trend and Operational Practices to Process	<ul style="list-style-type: none"> • Review of historical Cu grades in Concentrate • Trend in smelting practices to cope with the lower grades • Bottlenecks encountered in process equipment • Modifications installed to maintain smelting capacity • What future options are available or needed to remain competitive in current custom markets
Wednesday 15:30-16:30	Impurity Management of Arsenic, Lead, others	<ul style="list-style-type: none"> • Arsenic deportment in smelters generic • Arsenic trend in custom concentrates • Why is Arsenic an issue Technology to manage Arsenic in concentrates
Thursday 11:00-13:00	Technology Discussion for Treating Low Cu Grade Concentrate	<ul style="list-style-type: none"> • Smelting technology review • Pros and Cons of each technology • New emerging technology • Which technology is best for purpose

*The time of each subject may be changed as per the needs of the organizers and participants
