

2016 :: SUSTAINABLE INDUSTRIAL PROCESSING SUMMIT & EXHIBITION

International Symposium World Forum on Sustainable Coal Combustion and Processing

- (1) Reducing and/or eliminating the CO₂ discharge in atmosphere from combustion processes
 - New revolutionary combustions methods; Chemically washing minerals and impurities
 - Gasification ;Treating flue gases to remove pollutants Carbon capture and storage
 - Dewatering lower rank coals (brown coals) etc.
- (2) Capturing and processing CO₂ from combustion processes to beneficial products
 - Pre-combustion capture ; Post-combustion capture ;Oxy-fuel combustion
 - Other captures and processing methods and technologies
- (3) Develop/use carbon-free but economically viable new technologies.
